## Business translations

Alphatrad is here for companies which use foreign languages as a tool to develop and grow on the international market. We've got the specialist expertise and experience you need.

## Fast translations

Contact our fast translation department. They can give you a complete translation within hours, depending on the size of the document.

## Desktop publishing

Your commercial, technical, and scientific documents deserve to be effectively and attractively designed, formatted, and edited.

We'll design and rework your documents, making sure that the translation does not lose any of its subtlety and that it's integrated perfectly with your files. We'll ensure it remains in the appropriate format too, even if the target language uses Cyrillic, Asian, or Arabic characters.

## Technical and specialised translations

The translators on our international platform are chosen for their technical and industrial experience.

They translate into their mother tongue and live in the country in which it is spoken.

## Interpreting (liaison, consecutive, telephone or remotely)

Interpreting is commonly used to aid commercial relations, diplomacy or business meetings involving very small groups.

## Legal and certified translations

A legal translation must be carried out by a specialist legal translator.

Any translation used in an administrative application or international tender dossier must be approved by a certified translator.

The Alphatrad platform includes an international network of legal and certified translators.

## Voice-overs

Alphatrad offers a voice recording service in the language of your choice.

### Some examples:

- Audio recordings for your videos on YouTube or Dailymotion, multimedia presentations and website content, E-learning, and museum guides...

## Transcribing audio and video

Alphatrad also offers a transcription service, allowing you to convert any type of audio or video media into a text file.

### This service is available for the following formats:

- MP3
- MPEG
- WAV
- WMV
- AIFF
- AAC
- AVI and others.

## Website translations

The translation of web content is one of our most popular services.

Our translators are skilled at preserving the character and subtleties of the original content.

Your site will only be fully optimised if your keywords are accurately translated and properly adapted to your target market.

## Subtitles

With subtitles, you can create and distribute videos of any size to international markets - in record time.
